Record

Co-Founder, Engineering	Tacit. Co-founded a forward-deployed AI firm; we build source-backed finance agents for private-market teams.	2026 - Present
AI Engineer, Agentic Systems	Volpi Capital. Owned the firm's internal AI/data stack across origination, research and monitoring.	2026
Co-founder, Growth & Data	Aurelle. Built and ran growth, data systems and operations for a fast-growing DTC brand.	2022–2025
Consultant, Regulated Systems	KPMG. Turned FDIC 370 regulation into data architecture across Tier-1 banking environments.	2019–2022
Developer, Internal Tools	Siemens. Replaced manual sales and quoting workflows with internal tools and native iOS apps.	2016–2019
MSc Computer Science	University of Birmingham. AI/ML focus; dissertation on geometric structure in neuroimaging.	2025–2026
BSc Management Information Systems	University of Georgia. Dean's List; systems thinking and applied technology.	2013–2017

Systems

MidMarketBench Benchmarking frontier AI on private-market investment workflows.
midmarketbench.vercel.app

InvestorStack Operating-stack intelligence for investment teams.
investorstack.vercel.app

DealState A source-backed deal-state workspace for investment teams.
dealstate-zeta.vercel.app

PE Labs Applied AI workflows for private equity.
pe-labs.vercel.app

Geometric structure in neuroimaging MSc research at the University of Birmingham, 2025–2026.

Skills

ai/agents: anthropic + openai apis · claude code · agent workflows · rag · evaluation · observability
languages: python · typescript · react · sql
data: postgres/supabase · sqlite · context architecture · agent-readable knowledge bases
infra: cloudflare workers · vercel · docker · github actions
workflows: origination · research · monitoring · diligence · reporting
